

Federal Communications Commission

§76.1210

or to provide unauthorized access to service.

(d) Notwithstanding the foregoing, navigation devices need not be made available pursuant to this section where:

(1) It is not reasonably feasible to prevent such devices from being used for the unauthorized reception of service; or

(2) It is not reasonably feasible to separate conditional access from other functions without jeopardizing security.

(e) The requirements of this section shall become applicable on July 1, 2000.

(f) Paragraphs (a)(1), (b), and (c) of this section shall not apply to the provision of any navigation device that:

(1) Employs conditional access mechanisms only to access analog video programming;

(2) Is capable only of providing access to analog video programming offered over a multichannel video programming distribution system; and

(3) Does not provide access to any digital transmission of multichannel video programming or any other digital service through any receiving, decoding, conditional access, or other function, including any conversion of digital programming or service to an analog format.

[63 FR 38095, July 15, 1998, as amended at 64 FR 29600, June 2, 1999; 68 FR 35822, June 17, 2003]

§76.1205 Availability of interface information.

Technical information concerning interface parameters that are needed to permit navigation devices to operate with multichannel video programming systems shall be provided by the system operator upon request in a timely manner.

§76.1206 Equipment sale or lease charge subsidy prohibition.

Multichannel video programming distributors offering navigation devices subject to the provisions of §76.923 for sale or lease directly to subscribers, shall adhere to the standards reflected therein relating to rates for equipment and installation and shall separately state the charges to consumers for such services and equipment.

§76.1207 Waivers.

The Commission may waive a regulation adopted under this subpart for a limited time, upon an appropriate showing by a provider of multichannel video programming and other services offered over multichannel video programming systems, or an equipment provider that such a waiver is necessary to assist the development or introduction of a new or improved multichannel video programming or other service offered over multichannel video programming systems, technology, or products. Such waiver requests should be made pursuant to §76.7. Such a waiver shall be effective for all service providers and products in the category in which the waiver is granted.

§76.1208 Sunset of regulations.

The regulations adopted under this subpart shall cease to apply when the Commission determines that (1) the market for multichannel video distributors is fully competitive; (2) the market for converter boxes, and interactive communications equipment, used in conjunction with that service is fully competitive; and (3) elimination of the regulations would promote competition and the public interest. Any interested party may petition the Commission for such a determination.

§76.1209 Theft of service.

Nothing in this subpart shall be construed to authorize or justify any use, manufacture, or importation of equipment that would violate 47 U.S.C. 553 or any other provision of law intended to preclude the unauthorized reception of multichannel video programming service.

§76.1210 Effect on other rules.

Nothing in this subpart affects §64.702(d) of the Commission's regulations or other Commission regulations governing interconnection and competitive provision of customer premises equipment used in connection with basic common carrier communications services.
